

SLICE 'N' FUN™

FORCE-LINK™

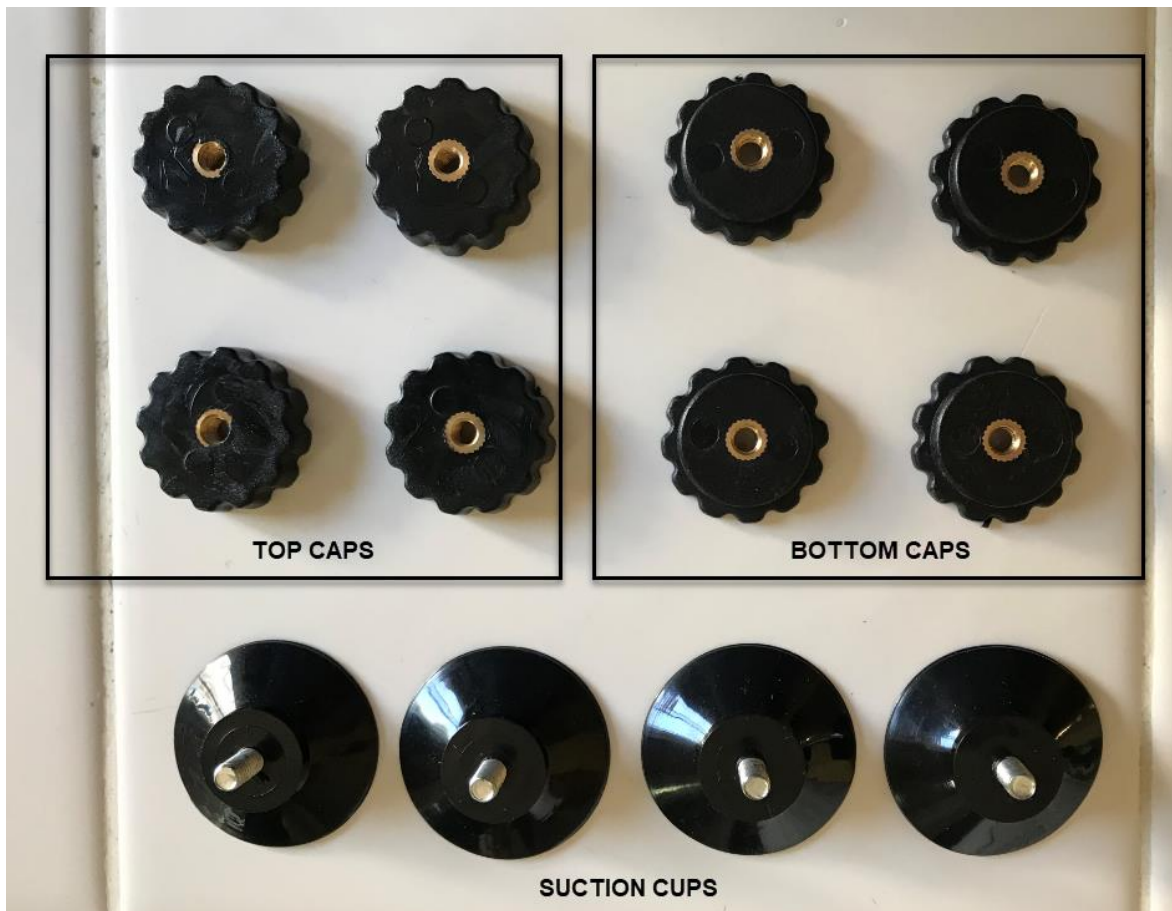

Suction Cup Assembly Guide

Time to assemble: 5 minutes

No tools required

Remove all suction cups from the bag. You only need 4 sets. There is 1 extra set. Save that in a safe place.

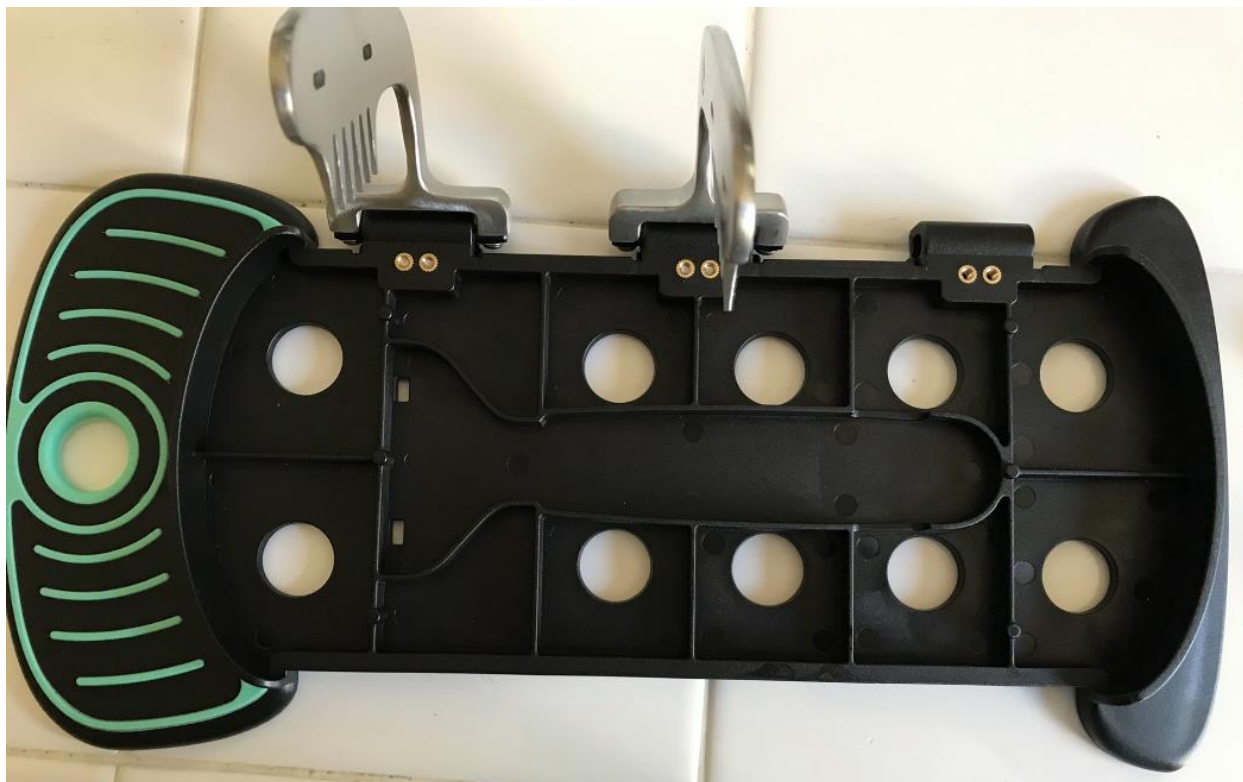

Step 1 Unscrew and remove the two caps from each of the 4 suction cups.

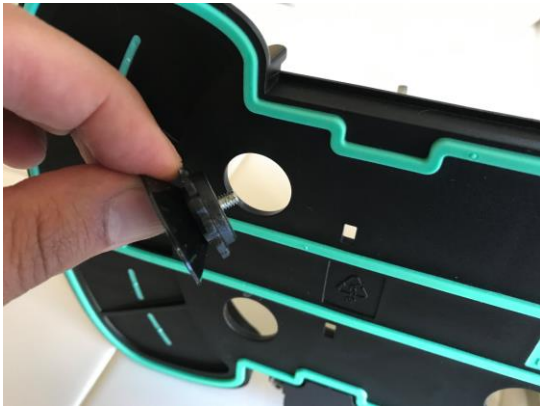

Step 2 Screw bottom cap to suction cup until it bottoms out as shown below. Do not over tighten. Repeat 3 more times to make 4 complete sets.

Step 3 Move the force links out of the way. Remove the cutting board and mats from the base so you can see the large holes in the base.

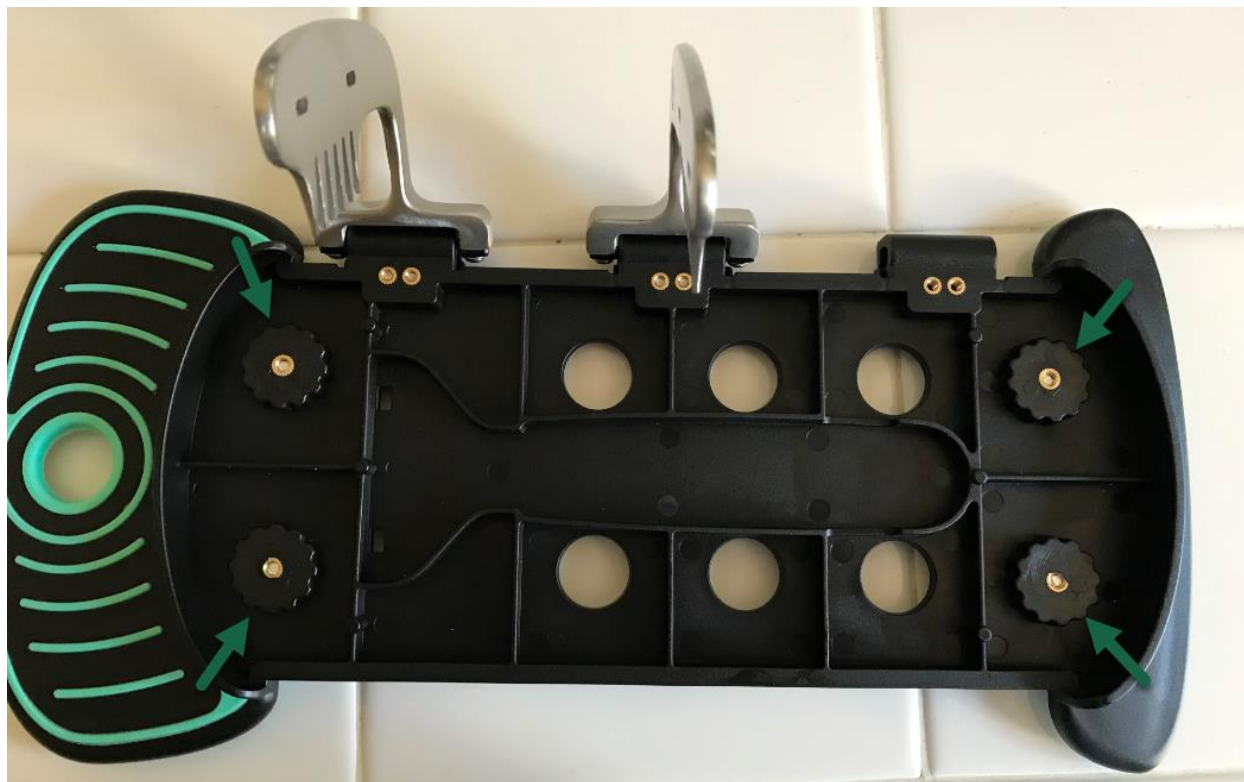

Step 4 Feed the suction cup and bottom cap assembly into the hole in the base. It might take a little bit of force to push it into the hole. You might hear a click sound once it is assembled into the hole. Look at the top side to make sure it is assembled in properly. Repeat 3 more times to assemble all 4 sets.

Step 5 Take the top cap and screw it on. Repeat 3 more times.

Step 6 Your Slice 'N' Fun is ready for use.

Step 7 The herb stripper, mats and the cutting board can now be placed on the base.
